Kiosk with Cloud Based Algorithmic SW Produces a Virtual Service Advisor

How does it Work?

Six functions are performed on a Kiosk make the customer experience really work. Straight-forward customer check-in, after hours' vehicle pickup and payment, digital document transactions, equity mining, and recommended service upselling, with customized promotions and a branded user interface.

With this tool dealers and OEMs will now be able to provide their customers with seamless omni-channel automated, mobile and self-service kiosk experience.

The GoMoto Kiosk Platform is a cloud-based, customizable software and hardware system that can create comprehensive, dealer-focused solutions that can drive sales and provide customer captivating interactive technology

When was the Customer Service Kiosk Featured?

UpdatePromise recently debuted the GoMoto Consumer Experience Kiosk at NACE Automechanika in Chicago. This latest addition to the UpdatePromise solution elevates the Consumer Experience to a new level.

What makes this Kiosk so special?

The Kiosk Platform is a cloud-based, customizable software and hardware system that creates comprehensive dealer-focused solutions that drives sales and provides customer captivating interactive technology in-store.

The power and capability of artificial intelligence with the consumer comfort of a kiosk are now being leveraged to improve the dealership service drive and showroom.

What does Curtis Nixon, UpdatePromise CEO to says about it?

“UpdatePromise focuses on perfecting the Consumer Experience for consumers and businesses alike. This latest platform by UpdatePromise elevates the Consumer Experience to a new standard. It is quite literally the future of the Consumer Experience.”

What you need to know about UpdatePromise:

UpdatePromise has increased its national presence this year by attending several of the industry’s top trade shows, including a joint appearance at NADA 2017 with integration partner DealerBuilt, and attendance at Digital Dealers 22.
